Swenzel-------Tuesday,
Tustin, D. D.-------Wednesday,

The Philadelphia American gives the following sammary of the proceedings in this case on Wednesday:

In the court of quarter sessions the trial of Allibone and Newhall was continued. Mr. District Attorney Longhead continued and concluded his opening speech, and the evidence commenced. John H. Haverstick, a dek in the bank, testified to the minute book, which the offered in evidence. The desages objections of the control of and the bank, testified to the minute book, which was then offered in evidence. The defence objecting to its reception, George Philler, jr., son of the cashier, was called, who swore to having copied the minutes in the book, but said that he was not present at the meetings of the board, which they reported. His father took the minutes and he copied them. His father was not in court, being sick, and the court ruled out the reception of the minute book as evidence. The testimony of George Philler, jr., then proceeded. He said that on various occasions Newhall had acted as prosident of the bank. He was proceeding to narrate a conversation he had with Newhall about \$10,000, which was rul xl out by the court, because Allibone was not present at it. Arthur Howell, one of the directors, next testified to Newhall having acted as president of the bank in Allibone's ab-Howell, one of the directors, next testified to Newhall having acted as president of the bank in Allibone's absence. John Whiteman, sr., paying teller, swore to three memorandum checks, amounting to \$136,900, having been counted cash from July 14th to September 22d with Allibone's knowledge, and on September 22d paid by a regular check from Newhall. These three checks are near thirst made by M. Core the decided were mere tickets, made by Mr. Cox, the foreign note clerk of the bank, and given to the receiving teller for sterling bills bought of the bank by Newhall, without any other equivalent than these memorandums, which were not signed by him. Newhall's checks were given for these tickets, and other matters, to the amount of \$262,254 78. A check for that amount was handed to szez, 254 78. A check for that amount was handed to the witness, who swore that it was the one given by Newhall. George Philler was recalled, and testified to memorandums in Allibone's handwriting, containing the appointment of Newhall as president protein. Alired Cox, the foreign note clerk, testified to various bills of exange, for large sums, granted to Newhall by Allibone's older. One of these was for \$82,733; a second for \$53,-553; a third for \$99,799 26; a fourth for \$29,666 60, ad a fifth for \$240,000. For all of those, credit was giv-ly the bank to Newhall by Allibone's order. The a by the bank to Newhall by Athodore's order. The into of these transactions was on the 6th of July, and the set on the 15th of September, the others covering the in-erceing time. The largest of these bills of exchange was produced, identified, and shown to the jury. These momous transactions, it will be observed, were close ormous transactions, it will be observed, pon the failure of the bank.

THE DUPONT WELL AT LOUISVILLE, KEN-TUCKY.

J. Lawrence Smith, professor of chemistry in the University of Louisville, has recently made an interesting report upon this work of art. We copy as follows:

"At the depth of 1,600 feet a sand rock was reached, doubtless of the lower silurian, and 97 feet deeper was encountered the first stream of water which reached the surface. This flowed out abundantly and with much force, the quantity not being sufficient, the boring was continued. After this it was unnecessary to use the bucket to take out the material detached by the borer, the force of the water higgings up the fragments very readily. The the water bringing up the fragments very readily. The water increased in quantity in going deeper, the increase being more marked at 1,879 feet, and still more at 1,900, s of rock weighing an onnce or two can with the water. The water increased every ten or twenty test to the depth of 2,036 feet; here a very hard magne-sian limestone was encountered, 6 feet in thickness. After shich the sand rock reappeared, and for the next 50 feet

which the sayu nors reappeared, and of the was no increase of water.

"From the urgent request of many citizens of Louisville the boring was now stopped to give a fair test to
the medical virtues of the water that was pouring forth at
the rate of 230 gallons per minute, or about 330,000 galloas in 24 hours. The water by its own pressure rises in

pipes 170 feet above the surface.

"The boring was accomplished in 16 months, and the depth reached is 2,086 feet, which depth we can better onceive of by referring to corresponding heights as rep-cented by spires in our city; imagine seven such spires athat of the Catholic Cathedral piled on each other." The water is very analogous in composition to the far-amed Kissingen water of Bavaria, and of Blue Lick in

EXCLUSION OF PAPER MONEY.

The Mississippian states that the experiment of exclu-ing all paper money of a denomination less than five ollars has succeeded perfectly in the State of Mississippi.

"The measure was wise, and has been found to be easi-caforced. It was at first habitually disregarded, and toduced considerable clamor, but its benefits are now uniereally admitted. The shimplasters of other States—that athsome vermin of currency—were scattered broadcast ver the State, and when the financial revulsion came, he people were made aware of their delusion and be

attipated. Shinplasters took their flight, and gold and alver—the only currency of the constitution—have flown a to the extent that small bills have been banished from invested.

Gen. Paez left New York city on Wednesday last, on is way to Laguayra, on board the government steamer stianta, and his son by the Caledonia, both steamers aving been placed at their disposal by the government. The Virginia Convention.

The Virginia Convention.

Petersaurac, Dec. 3.—The convention re-assembled at 10 o'clock this morning. The hall was more crowded than on yesterday. Mr. Barbour, of Culpeper, nominated Mr. Letcher for governor. Timothy Rives, esq., of Prince George, in opposition, was speaking at noon. He took up Mr. Letcher's record and poured in hot shot right and left, making quite a sensation. Mr. Pryor sat taking notes and will reply this afternoon. It is thought that no vote will be taken to-day.

During the debate of last night, Mr. Jackson, of Wood county, gave the lie to Mr. Sedden, of Stafford. It is rumored to-day that the parties left for North Carolina this morning to fight a duel.

[SECOND DESPATCH.]

Afternoon session.—Mr. Rives concluded at 4 o'clock. He was succeeded by Mr. Pryor, who is making a powerful speech for Letcher. The crowd is immense, and applause frequent and tumultuous. A ballot can hardly be taken to-night.

To Ed. of Evanorism.—In your number of the 15th instant, you say.—A correspondent asks us our opinion of the proparations advertised by Mrs. S. A. Allen, in our paper "bot, in the use of which, except the "Zylobalsamin," you profess to have had no experience. As I have tried a fair experiment with those articles, it may be of some use to others for me to commandate the result.

My ago is sixty. One year ago, my hair was very grey, and has been gradually failing, until, on the scrown, it has become quite thin. About the 1st of March, of the present year, I commenced using Mrs. S. A. Allen's "Restoror," No. 1, according to the directions, and have continued to apply a slight dressing of the same once in three or four weeks, on rothing to bed. My hair is now almost restored to its original color, and the hue appears to be permanent. I am satisfied that the preparation is medical like a dye, but operates upon the screetions. My hair ceases to fall, which is certainly an advantage to one who was in danger of becoming bald.

The "Zylobalsamium" I have found the best and most agreeable hair dressing of anything which I have ever used for that purpose.

The new hall and its furniture have been thoroughly put in order under the direction of the officers of the House, and we were glad to notice the old Speaker's chair, newly trimmed, upon the platform. The carved desks have been varnished, and the arrangements for the accommodation of the members have been much improved. An additional number of committee rooms are to have the use of the ante-room to the reporter's saloon, which has been fitted up for their use. There are two handsome tables, made by E. W. Hutchings, of New York, and furnished with registers and magnets made by the Bothers Chester, of the same city. The instruments which has been fitted up for the handsome tables, made by E. W. The plan of this beautiful work is as original as it is attractive. In no respect is it a more reproduction of the "Shakapeare Gallories" and "Heroines of Shak peare," so wall known to the trade, but with striking novelty and taates combines the atory-telling quality of Charles Lamb with the graceful criticism of Mrs. Jameson. The editors has placed to the strength of the strength of the page as from picture to picture, she conducts the reader-visitor through her gallery, desightfully describing with story and quotation, and continually surprising with the untechnical opinions of a fresh and shrowd mund. The work is a counterpart and fitting companion to the "World-Noted Wemen" of Mrs. Mary Cowden Clarke, an the "Republican Conit" of Mr. Griswfol.

THE WASHINGTON CHILDREN'S MISSION

THE LADIES of the First Unitarian Church moved by the sad condition of a large number of poor children is Washington, have commenced a mission, the object of which is to escene from the streets and alleys of the worst neighborhoods as many as possible of that number who, either by the misforsune, cuit, or negligence of their parents, or from causes incident to the imperfectness of human society, are growing up to swell the ranks of

many as possible of that number who, either by the misforune, guilt, or negligence of their parents, or from causes incident to the imperfectness of human society, are growing up to swell the ranks of "the dangerous classes" of American cities.

They have rented and formshed suitable rooms in the Fourth ward, employed a teacher, and are daily receiving children, who, coming from abodes of poverty, and often worse than poverty, by being surrounded during the day with a Christma atmosphere of kindness and forbearance, and being taught the common elementary branches of education, will be saved from great peril, and some of them, it is hoped, become very useful men and women.

Very frequently it is found necessary to supply shoes or other essontial garments, and if the means could be obtained it would be desirable to furnish one plain, but sufficient men! yer diem during the approaching winter. Being constantly under our supervision—except at night—the chances for imposition are very much lessened; it is certain, moreover, that nothing can be wasted which gives to children the power to read the libble and the constitution, or feeds and warms them, even though their parents should prove unworthy.

We submit the following considerations to the benevolent:

That it is the duty of all good Christians and all good citizate to take good care of the young, because nothing can be more dangerous in a republic than the presence of lawless bands of youths.

That there is not sufficient public school accommediation for the power children of Washington— a fact too notortous to heed demonstration. And, if there were, still the same necessity would exact for sectioning those from adanger who, from the power by meglect of their parents, would not seek educational advantages:

That it is only by direct effort among the poor, by personal appeal to teem, and personal sacritice for from the power for neglect of their parents, would not seek educational advantages:
